

18th January, 2014

Dear Recruiting Team,

I am currently a graduate student in computer science at Northeastern University. I plan to specialize in Software Development. The job description posted on job portal has aroused my interest to apply for internship at Yelp Inc. I believe I would be a good fit for the given job description.

Through my previous college and graduate education, I have developed a strong background and interest in software development. I think my knowledge and understanding of concepts of basic programming, gained during my earlier education and experience during the internship will enable me to work well with little assistance. I strongly believe that I have good programming and analytic abilities required for the job.

I am familiar with various web development technologies like ASP.NET, JavaScript, XML, jQuery, HTML5, CSS. Currently I am developing a website as a part of Web Development course using C# and ASP.NET technologies using Google Maps API. Also, I am well versed with the Object Oriented Programming concepts in java and python. I am passionate about learning and excelling at new technologies. Apart from curriculum courses, I have completed various online courses from Coursera website. I am confident that I would make a significant contribution to the continued success of your company.

Although the accompanying resume illustrates my background well, I feel that a personal interaction would help me to demonstrate my skills and abilities better. I really appreciate your time and consideration of my request, and I look forward to hear from your side.

Yours Sincerely,
Bhavik Gandhi.
